

*Division of Human Immunology, Hanson Institute
Adelaide, South Australia*

Applications are invited for: HI Career Development Awards

The Division of Human Immunology at the Hanson Institute provides support for talented individuals who wish to pursue a career in the biomedical sciences through a broad portfolio of personal award schemes. These range from studentships for early research training through to post-doctoral research training fellowships, **career development opportunities** and laboratory head positions for more senior investigators.

The HI Career Development Awards is intended to fund candidates to become highly competitive for Fellowship appointments at completion of the HI Career Development Award (eg Florey Fellowship, RD Wright Awards or Research Fellowships). It is also expected that the appointments will introduce new disciplines or skills to enhance existing research strengths of the Division of Human Immunology.

Preference will be given to applicants who have had post-doctoral or post-medical specialist position experience overseas or interstate, particularly if they are able to demonstrate that they bring new and innovative skills and research to an active research group.

Further information on this and other funding opportunities can be found on our website at www.imvs.sa.gov.au/immunology and additional details can be requested by email from angel.lopez@imvs.sa.gov.au.
